---

With the projects on this website I hope to encourage people to designing and building their own *high-end* audio equipment, which not only sounds better, but costs less than many commercial equivalents. But be warned, instead of spending a lot of *money*, you will be spending a lot of *time* instead, so only start this hobby if you figure it is fun to do!

The site contains projects, articles, videos and other helpful information on the following subjects

- \* DIY (Do-it-yourself) audio amplifiers and related equipment
- \* DIY audio speakers
- \* Electronics
- \* Measurement techniques and equipment
- \* Simulations

# Welcome!
