The shipping and handling costs are made weight dependent, which means they better represent the actual costs. This makes the S&H costs for ordering a small number of parts that fit through the mail box even cheaper.

The exact amount can be shown in the following table:

| Destination/Max weight | 0.25kg | 0.5kg | 2kg |
|------------------------|--------|-------|------|
| Netherlands | 2,- | 3,- | 3,- |
| EU | 4,- | 7.50 | 9.50 |
| World | 6,- | 11,- | 17,- |
| n/a | | | |

Note: All values in EUR
